TITLE 219 - DEPARTMENT OF LABOR  
CHAPTER 17 - PROFILING

001. The profiling system set forth in sections 001 to 007 of this chapter shall be utilized in determining those workers referred by the Commissioner for reemployment services pursuant to *Neb. Rev. Stat. §48-627(6)*. The primary purpose of this profiling system is to identify and assist workers who are permanently separated from their employment due to layoff and who are likely to exhaust their unemployment benefits.
002. All claimants shall be reviewed to determine if they meet the current criteria for receiving reemployment services. The initial review shall occur immediately after a claimant has been paid unemployment benefits for his/her first week of eligibility in a new benefit year. The Commissioner may exclude interstate claimants from the review process.
003. Claimants for whom the work search requirements have been waived pursuant to 219 NAC 4, section 005 shall be deemed attached employees and shall not be referred for reemployment services.
004. The following factors may be utilized in the statistical model used to determine those individuals most likely to exhaust their unemployment benefits and benefit from reemployment services:
- A. The claimant's most recent separation from employment was due to a layoff occurring within three months of his/her first week of eligibility in his/her new benefit year;
  - B. Claimants selected for reemployment services shall be claimants who have received their first UI Benefits check;
  - C. The claimant's educational training and job tenure in his/her most recent employment;
